JOURNAL OF ELECTRON SPECTROSCOPY AND RELATED PHENOMENA

VOLUME 48 (1989)

Subject Index

acids
linear correlation of oxygen core-ionization energies of alcohols and acids with those of the corresponding methyl and ethyl ethers and esters 101
Ag
the energy dependence of the 4*d* partial photoionization cross section in metallic Ag and in Ag atoms on Si at the Cooper minimum and near the 4*d* threshold 353
alcohols
linear correlation of oxygen core-ionization energies of alcohols and acids with those of the corresponding methyl and ethyl ethers and esters 101
alkali fluoride (100) faces
the mechanism of near- UV photoemission from H_2O-induced electron states on alkali fluoride(100) faces c1
Ar
many-body calculations of the X–YY Auger energies of the atomic elements, Ar, Kr, Sr and Xe 125
Auger electron spectroscopy
channel electron multiplier efficiencies: the effect of the pulse height distribution on spectrum shape in Auger electron spectroscopy 209
Auger electron spectroscopy
sensitivity factors for $KL_{2,3}L_{2,3}$ transitions for light elements in Auger electron spectroscopy 203
Auger energies
many-body calculations of the X–YY Auger energies of the atomic elements, Ar, Kr, Sr and Xe 125
Auger spectra
energy structure of the Auger spectra of non-stoichiometric titanium carbides 13
azides
many-body effects in the ionization spectra of azides 187

boron hydride
SCF-Xα-SW calculations of the boron hydride molecule and ions 137

C1*s* binding energies
a study of C1*s* binding energies in some gaseous polycyclic aromatic hydrocarbons 179
CdI_2
X-ray and electron-energy-loss spectroscopies of PbI_2, PbF_2 and CdI_2 363
channel electron multiplier efficiencies
channel electron multiplier efficiencies: the effect of the pulse height distribution on spectrum shape in Auger electron spectroscopy 209
$^{12}C^{16}O/^{13}C^{16}O$–NaCl
comment on linear infrared spectra and laser-induced resonant desorption in the coadsorbate $^{12}C^{16}O/^{13}C^{16}O$–NaCl 405
Cooper minimum
the energy dependence of the 4*d* partial photoionization cross section in metallic Ag and in Ag atoms on Si at the Cooper minimum and near the 4*d* threshold 353
Cu/NiO/Ni(100)
the interaction of O_2 with Cu/Ni(100) and Cu/NiO/Ni(100) surfaces studied by XPS 421
Cu/Ni(100)
the interaction of O_2 with Cu/Ni(100) and Cu/NiO/Ni(100) surfaces studied by XPS 421

electron trajectory analysis
electron trajectory analysis of the spherical-sector electrostatic spectrometer: focussing properties and multichannel detection capability 55
esters
linear correlation of oxygen core-ionization energies of alcohols and acids with those of the corresponding methyl and ethyl ethers and esters 101
ethers
linear correlation of oxygen core-ionization energies of alcohols and acids with those of the corresponding methyl and ethyl ethers and esters 101

F_6
a comparison of valence level photoelectron cross sections for SF_6, SeF_6 and "F_6" from 21 eV to 100 eV photon energy 155
Franck–Condon analysis
an iterative Franck–Condon analysis procedure for the determination of ionic geometries for H_2O and H_2S 389

hafnium
an interpretation of the electron energy loss spectra of clean and oxygen exposed hafnium 143
helium
calculation of the triple differential cross sections for high energy electron impact ionisation of helium 1
H_2O
an iterative Franck–Condon analysis procedure for the determination of ionic geometries for H_2O and H_2S 389
H_2O-induced electron states
the mechanism of near- UV photoemission from H_2O-induced electron states on alkali fluoride(100) faces c1
H_2S
an iterative Franck–Condon analysis procedure for the determination of ionic geometries for H_2O and H_2S 389

σ_I inductive substituent parameter
the σ_I inductive substituent parameter as a measure of electronegativity, χ 375

$KL_{2,3}L_{2,3}$ transitions
sensitivity factors for $KL_{2,3}L_{2,3}$ transitions for light elements in Auger electron spectroscopy 203
Kr
many-body calculations of the X–YY Auger energies of the atomic elements, Ar, Kr, Sr and Xe 125

many-body effects
many-body effects in the ionization spectra of azides 187
MnO oxidation
XPS study of MnO oxidation 117

NSBr
spectroscopic studies of thiazyl bromide, NSBr 411

NSF
theoretical many-body interpretation of the valence shell ionization of SF_4, NSF and NSF_3 25
NSF_3
theoretical many-body interpretation of the valence shell ionization of SF_4, NSF and NSF_3 25

PbF_2
X-ray and electron-energy-loss spectroscopies of PbI_2, PbF_2 and CdI_2 363
PbI_2
X-ray and electron-energy-loss spectroscopies of PbI_2, PbF_2 and CdI_2 363
PH_3
detailed study of the photoionization of the inner-valence shell of PH_3 in the photon energy range 30–90 eV 379

SCF-Xα-SW calculations
SCF-Xα-SW calculations of the boron hydride molecule and ions 137
SeF_6
a comparison of valence level photoelectron cross sections for SF_6, SeF_6 and "F_6" from 21 eV to 100 eV photon energy 155
SF_4
theoretical many-body interpretation of the valence shell ionization of SF_4, NSF and NSF_3 25
SF_6
a comparison of valence level photoelectron cross sections for SF_6, SeF_6 and "F_6" from 21 eV to 100 eV photon energy 155
short-lived negative ions
study of triplet states and short-lived negative ions by means of electron impact spectroscopy 219
signal-to-noise ratio
smoothing and the signal-to-noise ratio of peaks in electron spectroscopy 43
silicone liquid
dielectric response of a silicone liquid excited by VUV radiation and electron scattering 435
smoothing
smoothing and the signal-to-noise ratio of peaks in electron spectroscopy 43
spherical-sector electrostatic spectrometer: electron trajectory analysis of the spherical-sector electrostatic spectrometer: focussing properties and multichannel detection capability 55

Sr
many-body calculations of the X–YY Auger energies of the atomic elements, Ar, Kr, Sr and Xe 125
Superconducting $YBa_2Cu_3O_7$ ceramic
evidence for Cu^{III} by X-ray photoelectron spectroscopy *c*7

titanium carbides
energy structure of the Auger spectra of non-stoichiometric titanium carbides 13
triple differential cross sections
calculation of the triple differential cross sections for high energy electron impact ionisation of helium 1
triplet states
study of triplet states and short-lived negative ions by means of electron impact spectroscopy 219

Xe
many-body calculations of the X–YY Auger energies of the atomic elements, Ar, Kr, Sr and Xe 125
X-ray photoelectron spectroscopy
a method for depositing well defined metal particles onto a solid sample suitable for static charge referencing in X-ray photoelectron spectroscopy 7
X-ray photoelectron spectroscopy
evidence for Cu^{III} in superconducting $YB_2Cu_3O_7$ ceramic *c*7
